

Experts confirmed for R&I of Choice (2-12 August 2010 in Zurich)

During the two weeks of the Contextual Learning Journey 2010 in Zurich the students will mostly work on their business plans, framed by entrepreneurship lectures, talks, and business visits. Additionally, the project groups might benefit from so-called R&I of Choice, i.e. "à la carte" discussions and inputs with/from experts at ETH Zurich as well as entrepreneurs and practitioners during site visits.

It is the responsibility of each group to decide weather they need the R&I of Choice experts for a discussion or not. Each group shall coordinate their needs with the coaches. Please allow at least 2 days of advanced planning to optimize the R&I of Choice expert's resources.

R&I of Choice takes place during specific time windows, depending on the availability of the experts, entrepreneurs and practitioners, and can run in parallel sessions for the individual project work groups.

The experts will meet the students in their working rooms in the CHN building.
